

COVID-19 Guidance for Employers

Testing criteria:

- Due to limited availability, COVID-19 testing is currently limited to symptomatic, high-risk patients with a physician's order.
- The CDC does not recommend testing for patients who do not have symptoms.
- We will continue to evaluate this daily & expand criteria as we have more testing capacity.

General guidance for employers:

- Employees with fever, cough and shortness of breath should not report to work.
- Employees who develop these symptoms while at work should be sent home.
- Employees with symptoms should **call ahead** to their physician's office for guidance.
- If an employee does not have a physician, he/she can do a COVID-19 screening E-Visit for \$20 by visiting www.anmedhealth.org/evisit.
